

## How to install the Yolngu keyboard onto your Mac computer

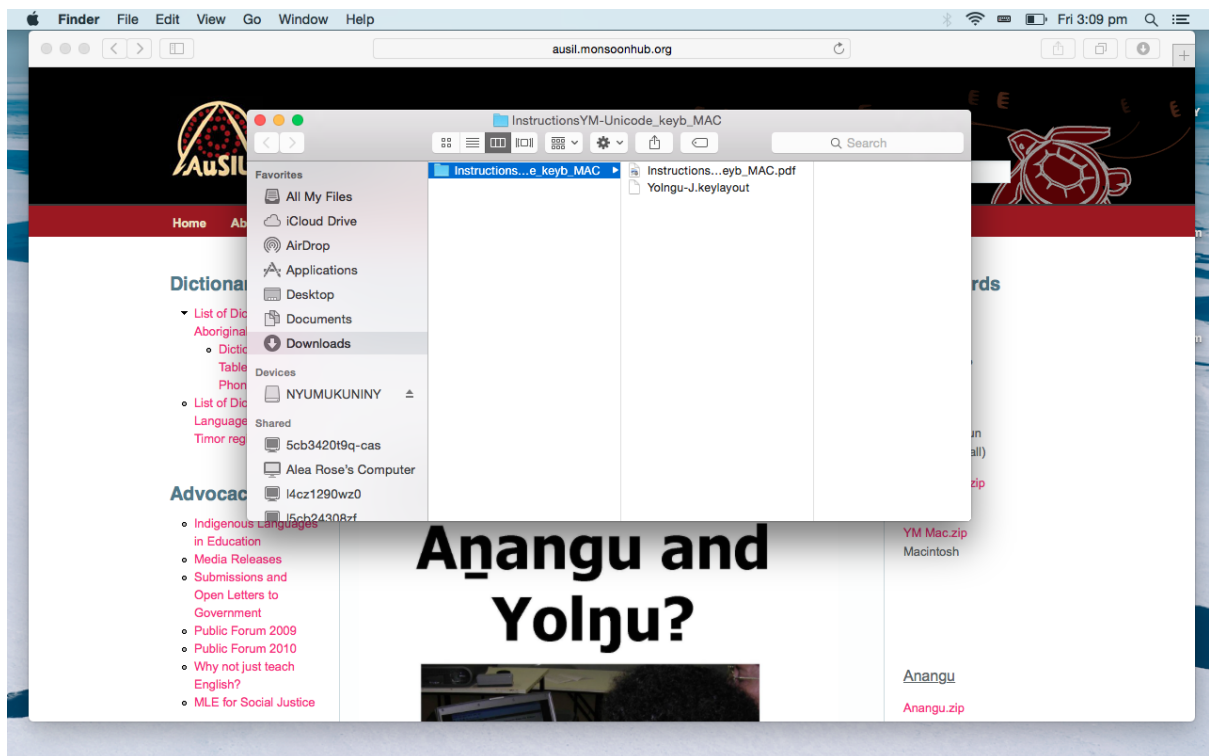

1. Go the Australian Society for Indigenous Languages website and download the YM Mac.zip file onto your computer.

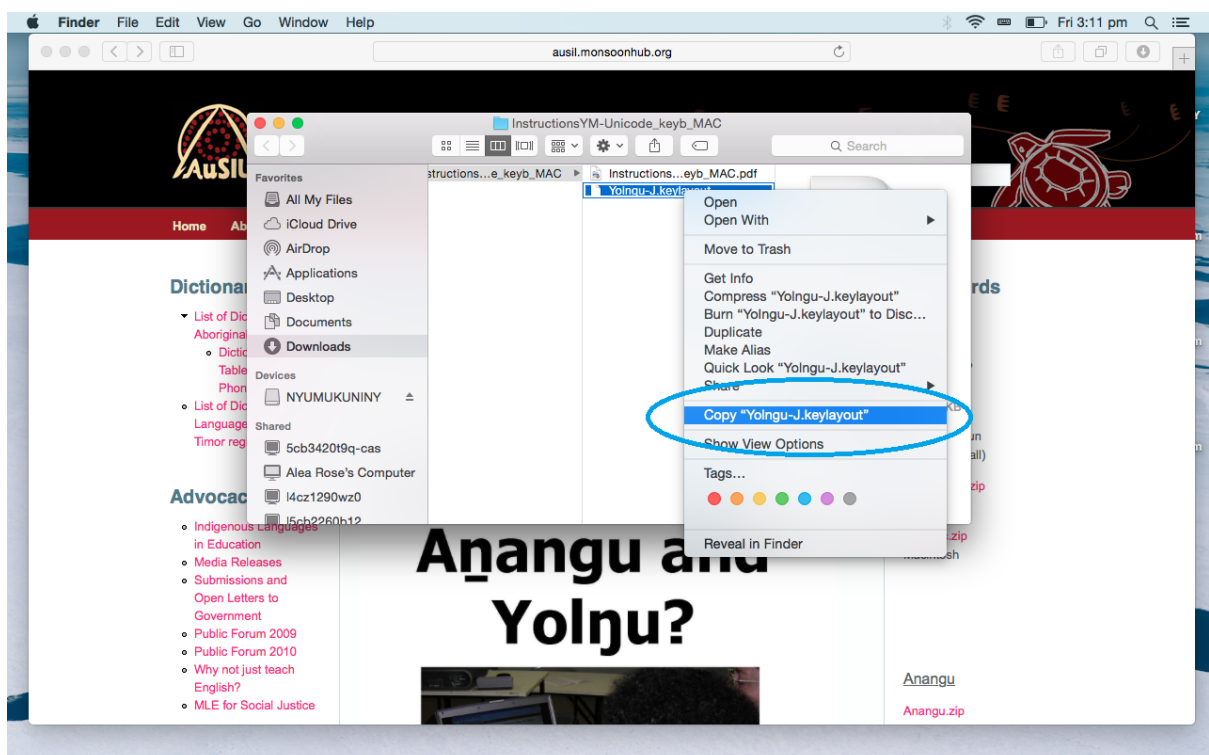

2. You can find the folder you downloaded here...

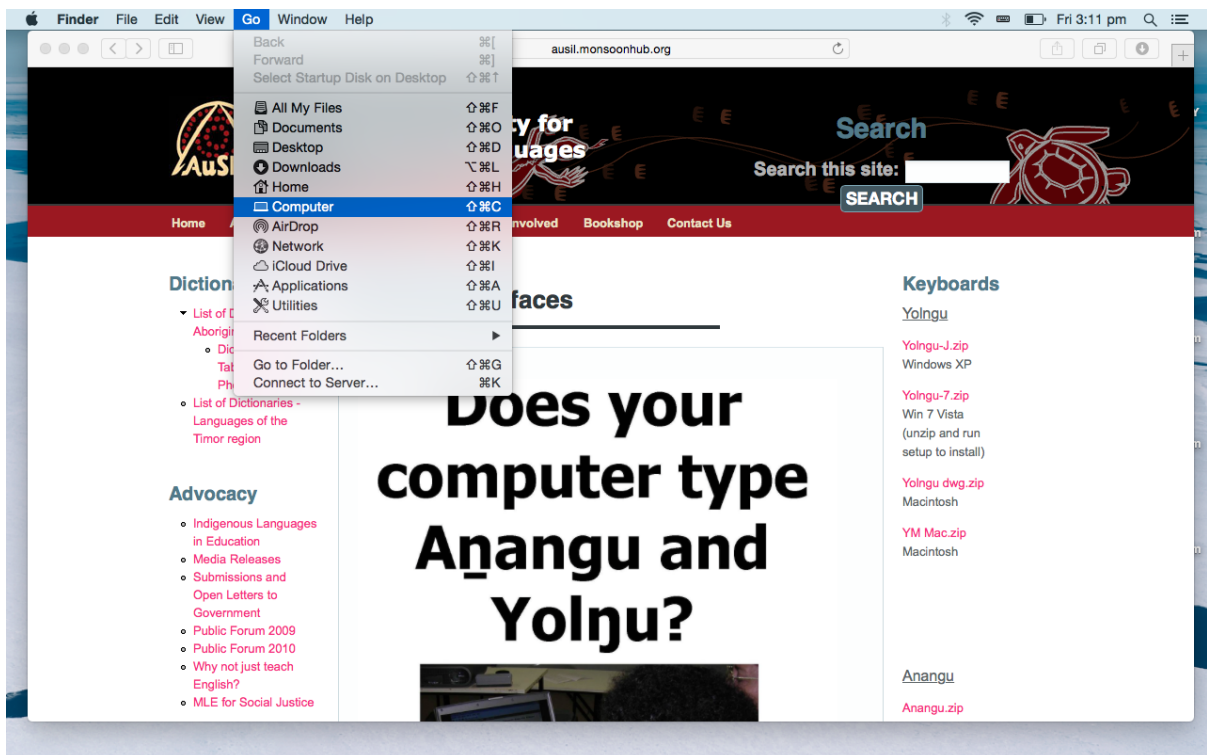

3. Please open that folder. ..

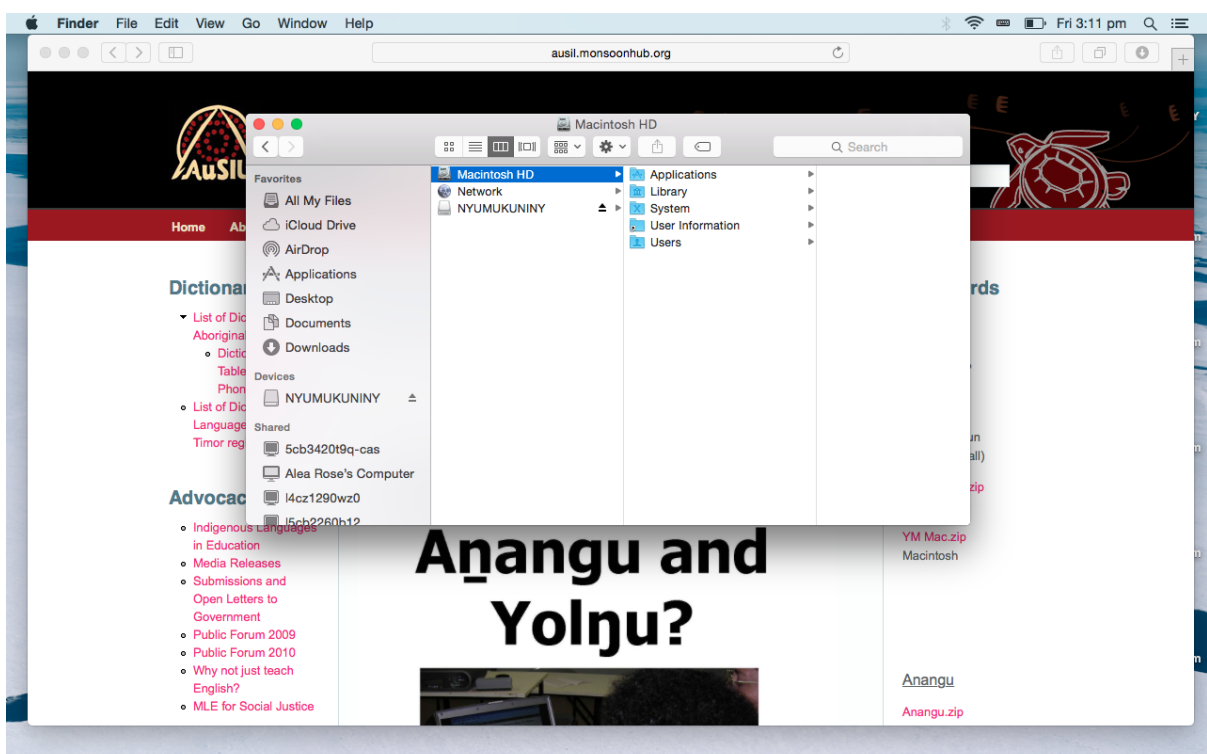

4. Then copy the Yolngu-J.keylayout file ...

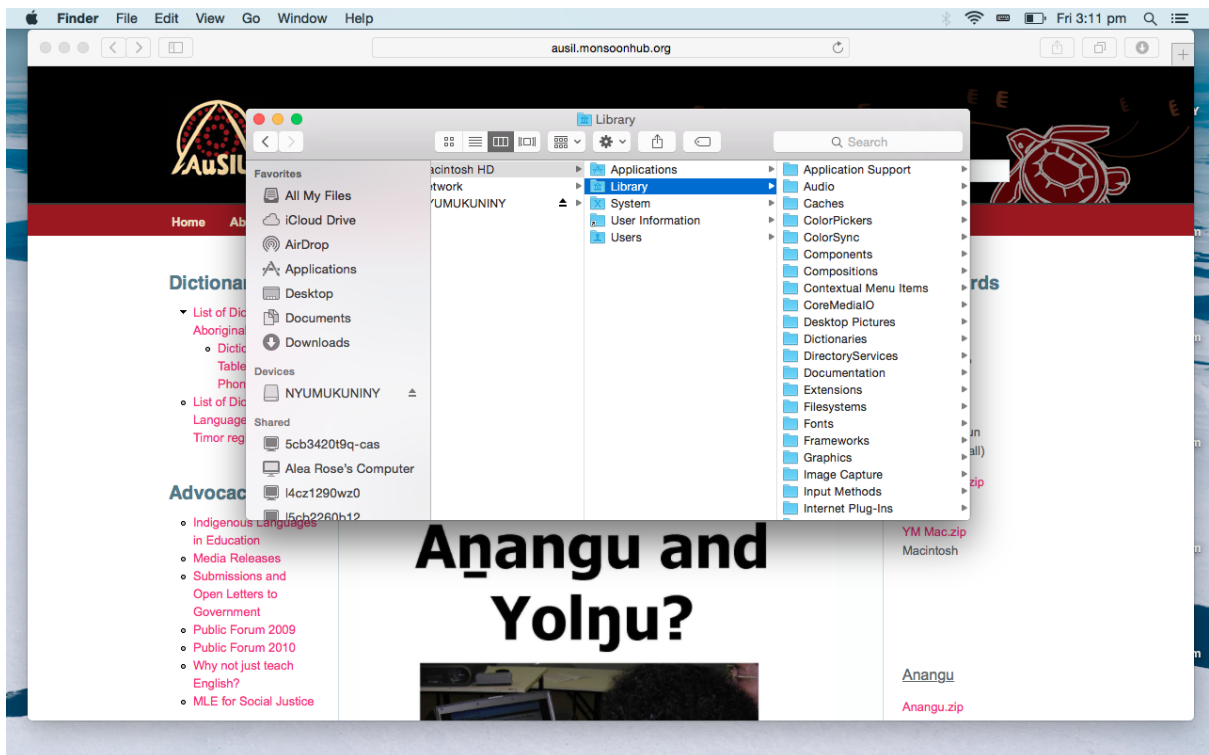

5. OK. Then please go to 'Computer' from 'Go' at the top menu bar.

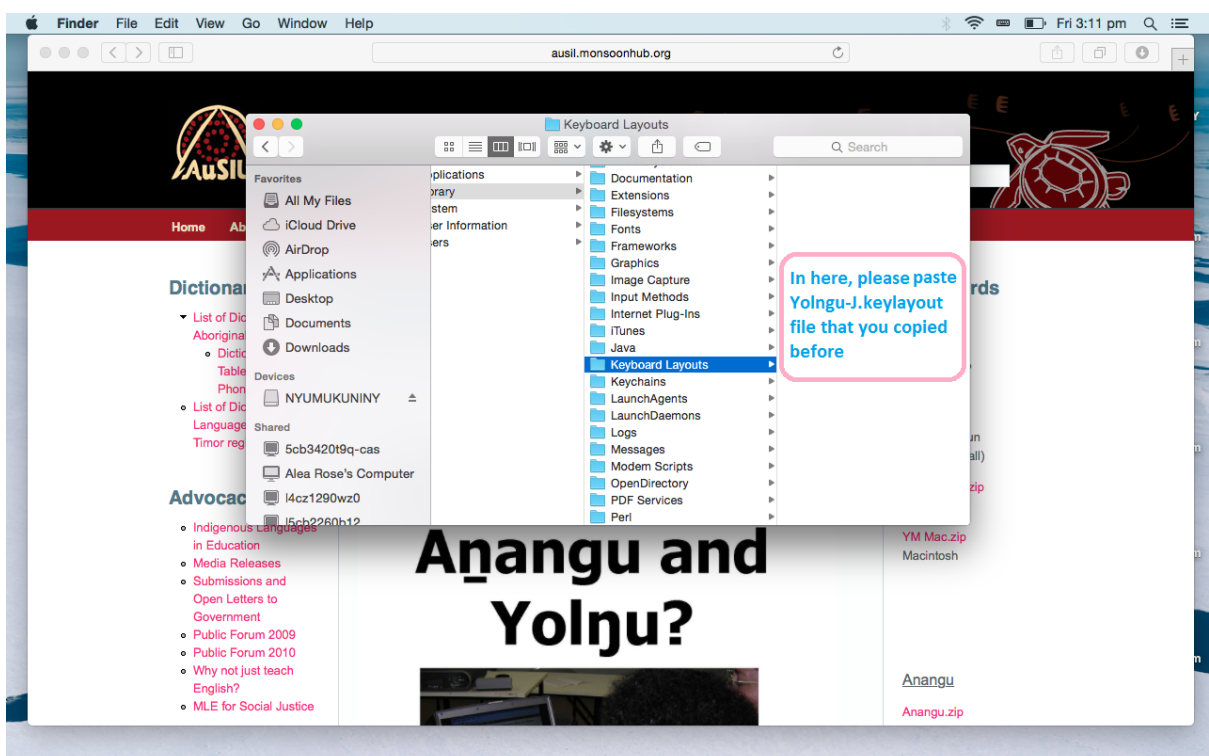

6. Choose 'Macintosh HD'...

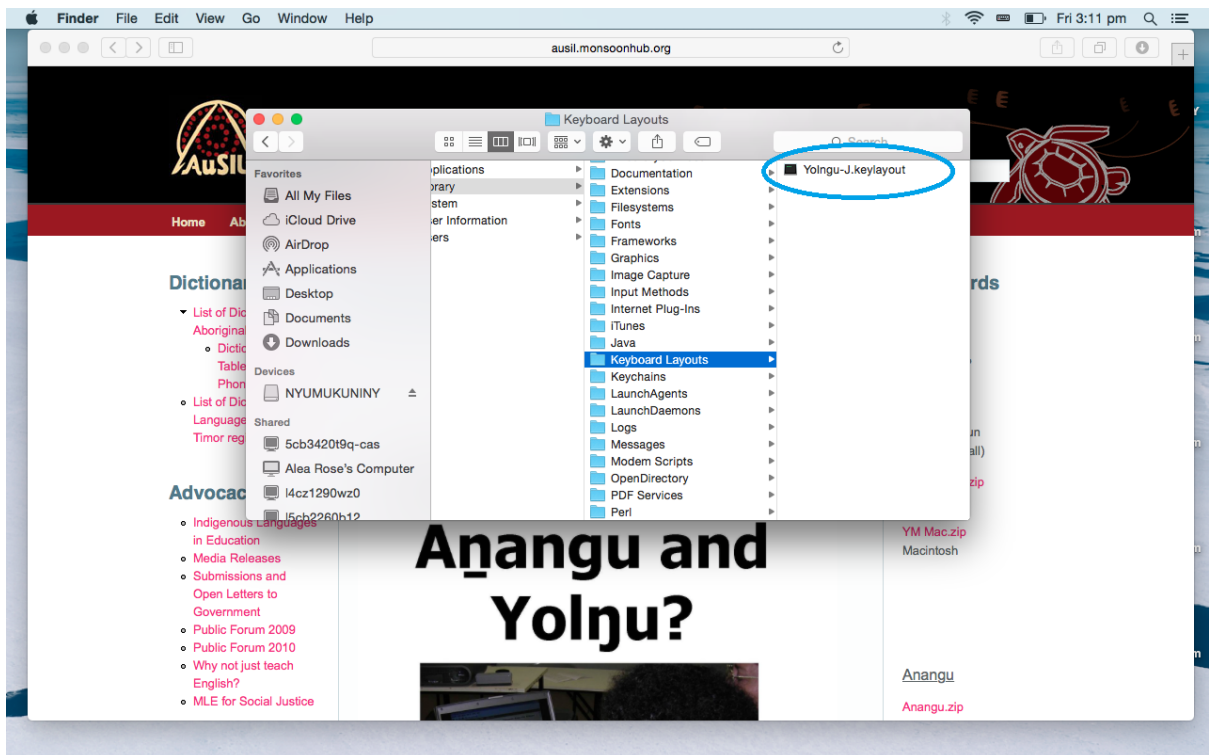

## 7. Choose 'Library'...

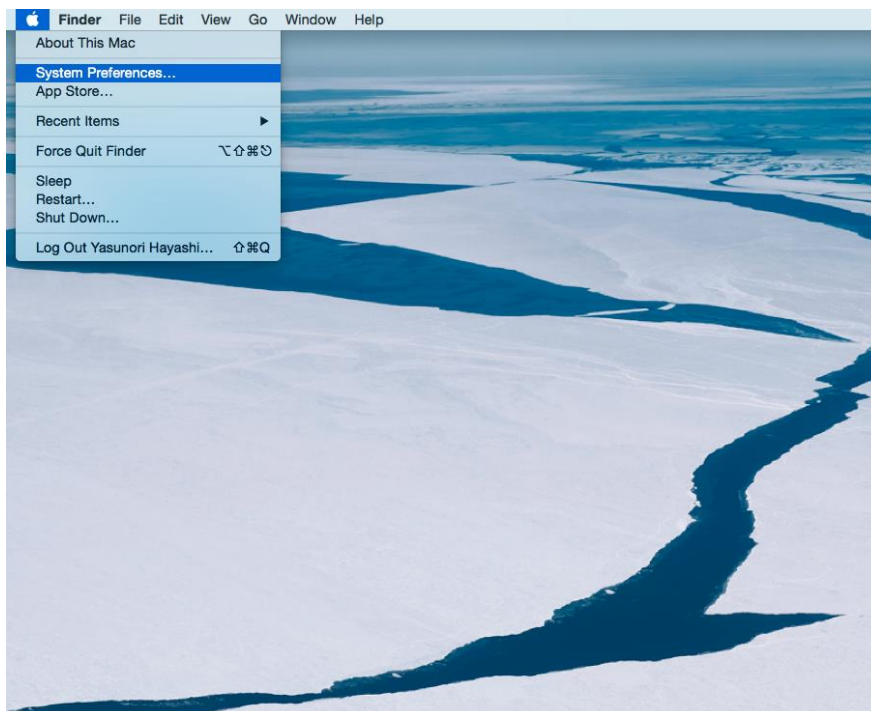

## 8. Choose 'Keyboard Layouts', then paste the file you've just copied.

9. Now the Yolngu Keyboard file sits under the Keyboard Layouts!

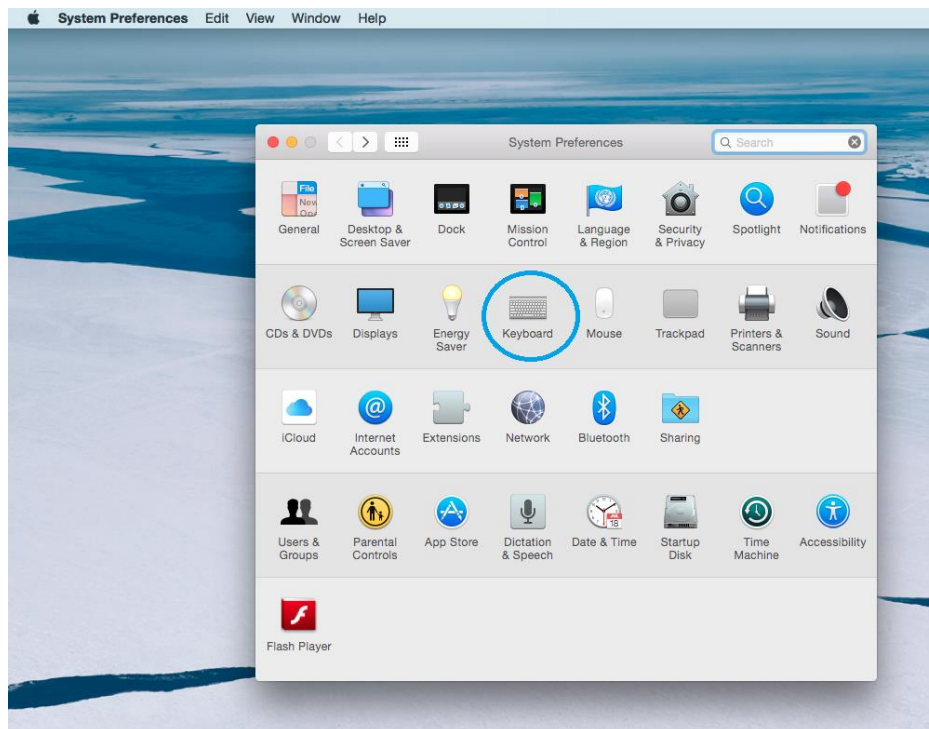

10. Close those windows and go to 'System Preferences' from the Apple icon...

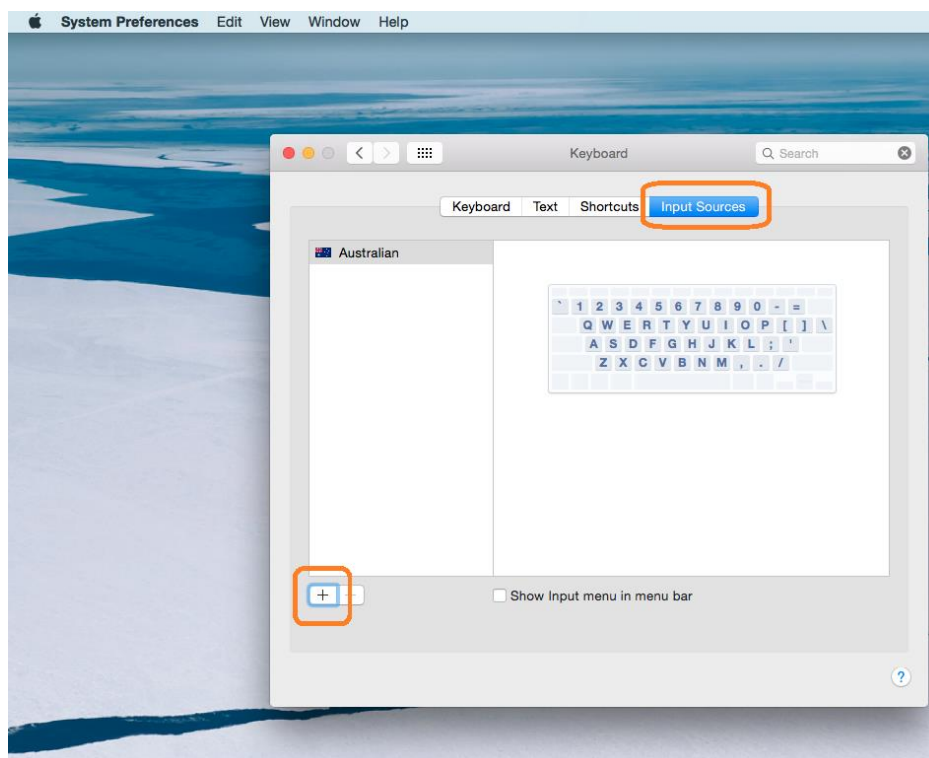

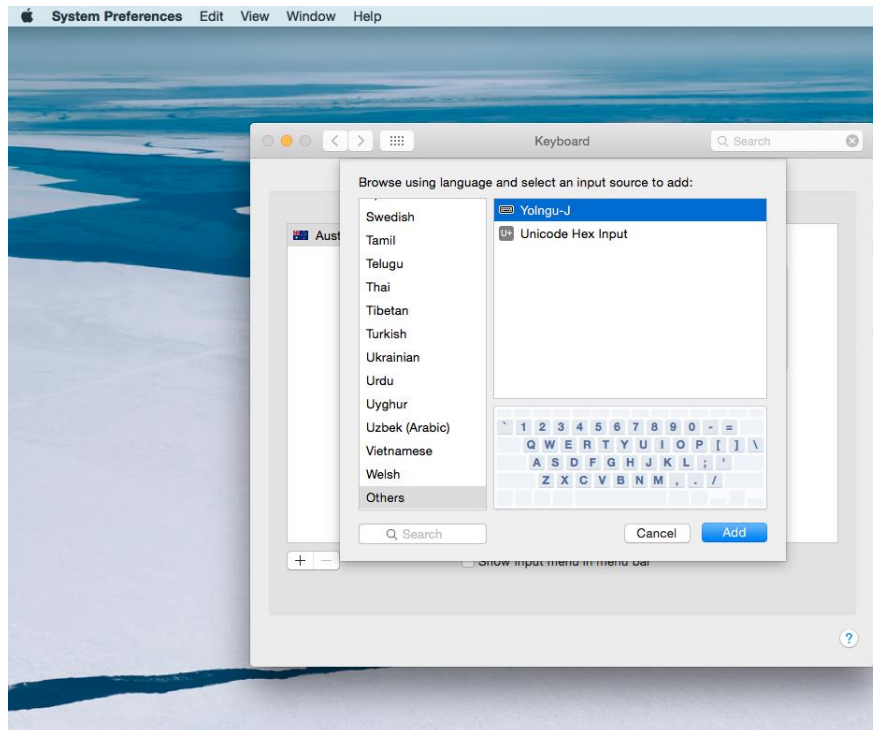

11. Then choose **'Keyboard'**...

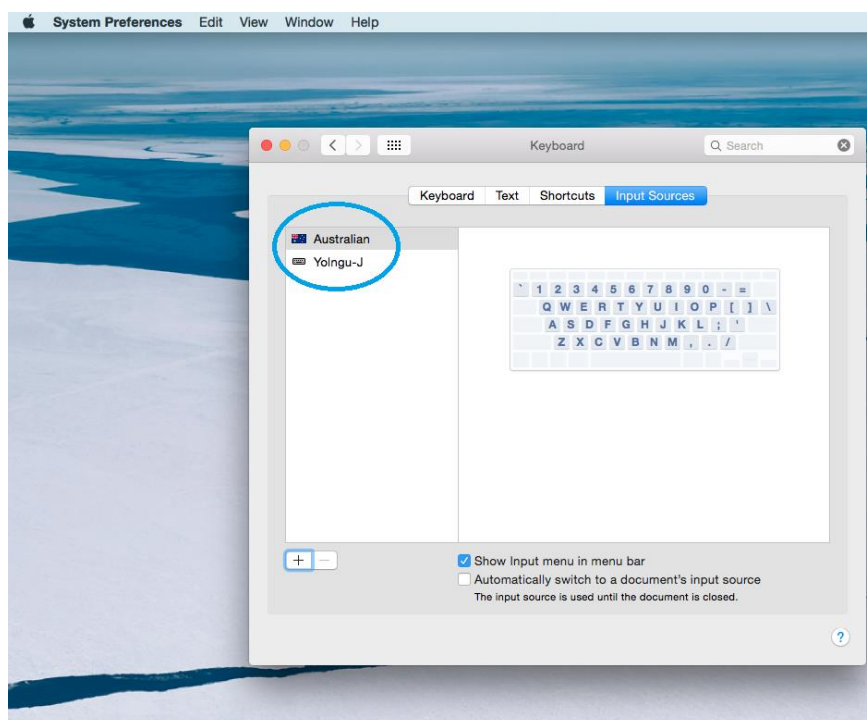

12. Click **'Input Sources'** and then click + button.

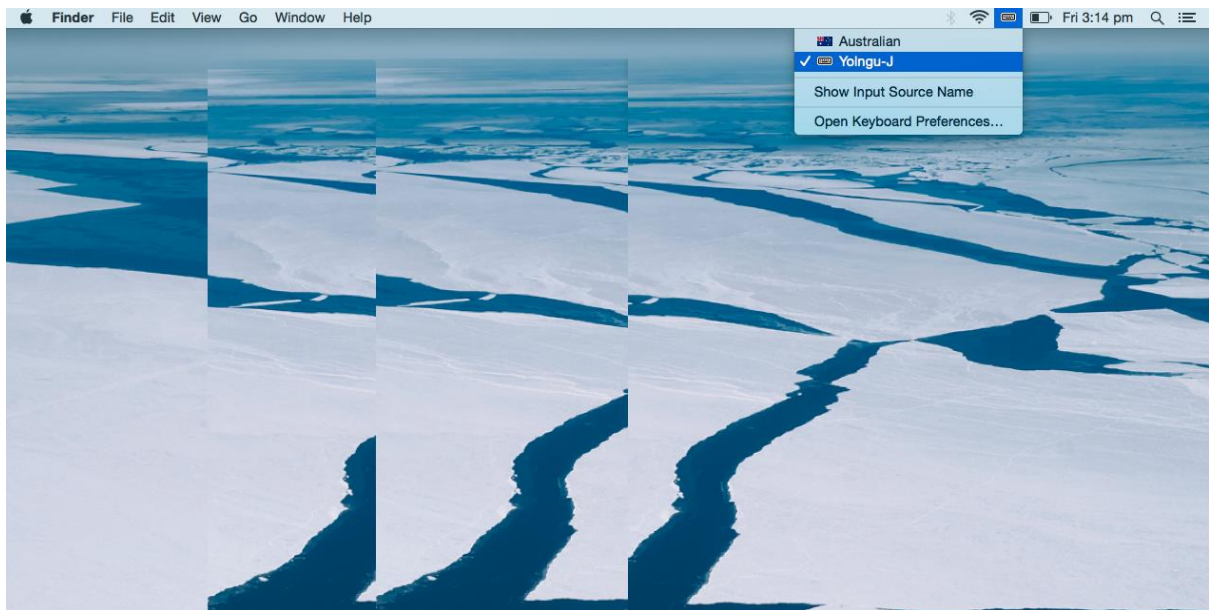

13. You can see heaps of keyboards available in the left column. Yolngu keyboard is sitting inside of '**Others**'. 'Others' is probably located at the bottom of the column. Then please choose Yolngu-J and press **Add**.

14. Now Yolngu Keyboard is installed !

15. Close the Keyboard option window and click the Keyboard icon as shown in the below. Then choose Yolngu-J...

16. Now you can type ŋ, ä, Ŋ, Ä, ɭ, ɮ, ɥ, ɹ, ɻ, ɿ, ɽ in your document, spreadsheet, email and facebook etc.
