Keybo

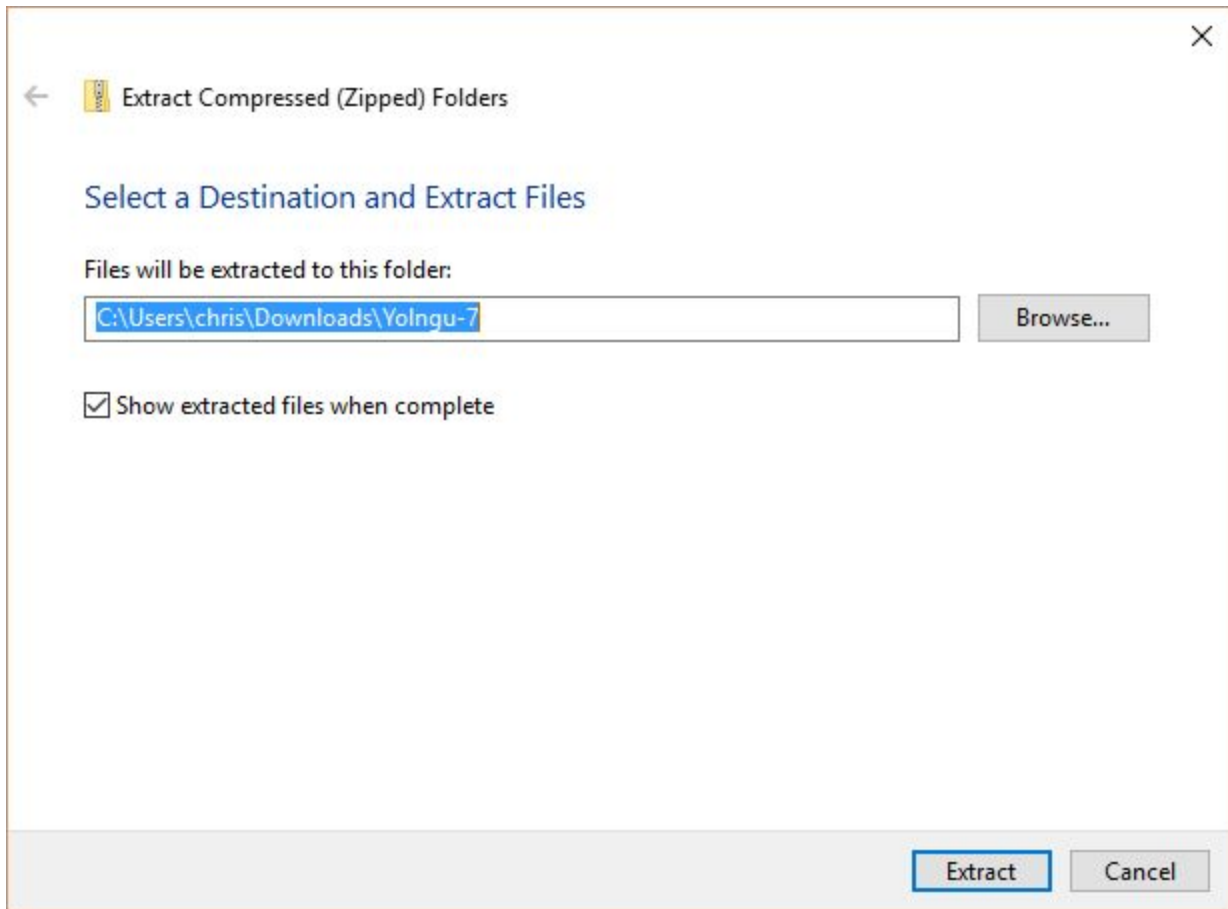

3. You can save the zip folder under your preferable location.

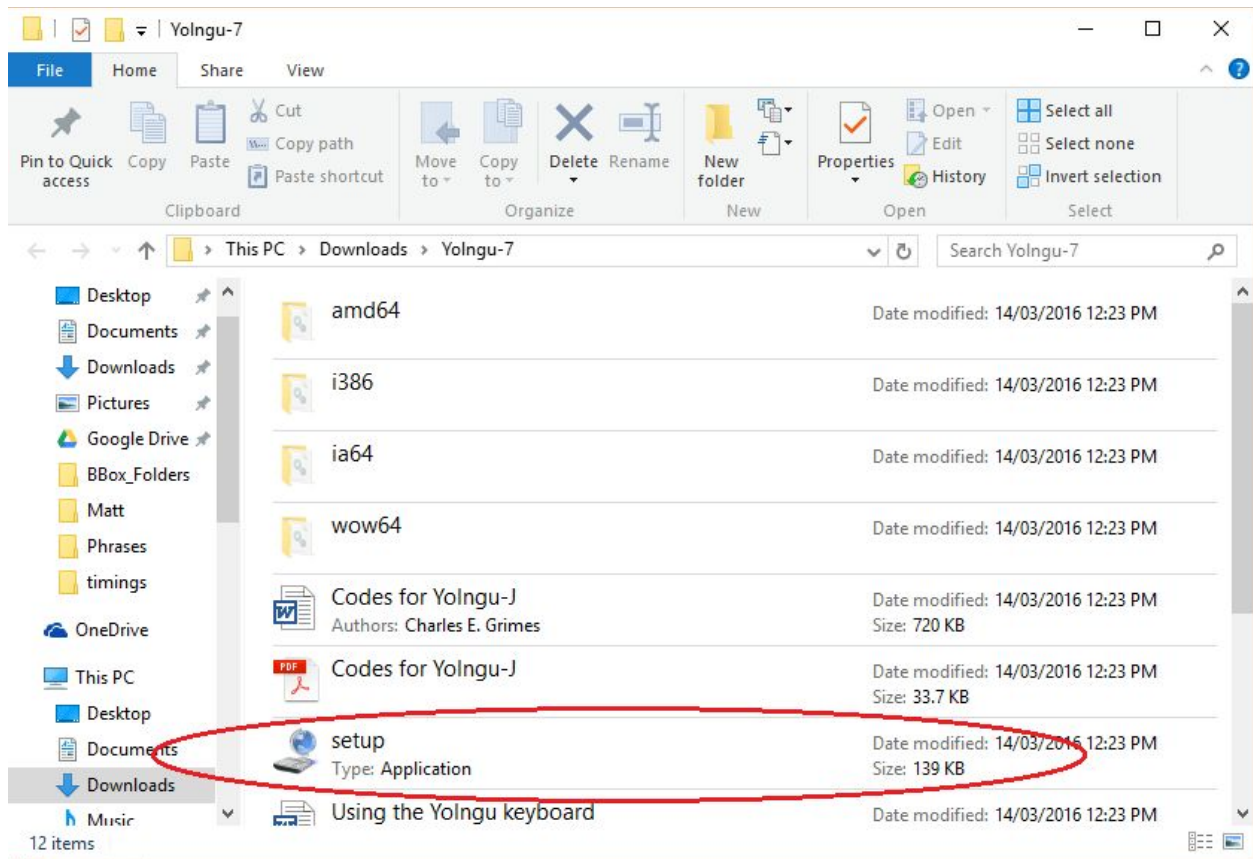

4. Right click on the zip folder you saved and click 'Extract All'.

5. Select a destination to which you want to extract files.

6. Right click setup.exe file amongst of the extracted files and select 'Open'.

7. Once it's installed on your computer, go to your icons at the bottom right of your screen to choose your language.

8. Select "YOR" to change to the Yoruba keyboard. Please note that depending on which version of Windows you are using the English keyboard could be "ENG" or "EN" and the Yoruba keyboard could be listed as "YOR" or "YO".
